

ToxiVision CO Responder Kit

**Be ready for your next
CO call!**

Biosystems CO Responder Kit is the complete and accurate solution for both residential and workplace carbon monoxide calls. The kit includes a rugged and dependable ToxiVision CO gas detector, a cylinder of calibration gas with regulator and all necessary calibration fittings, ten easy-to-use ToxiTube CO dosimeter tubes, operator's manual and quick reference card - all in a durable waterproof carrying case.

**CO calls have never
been easier!**

The ToxiVision CO Responder Kit was built with the fire service in mind. The kit includes everything you need to calibrate and operate the ToxiVision and 10 ToxiTube dosimeter tubes that can be left behind to continue monitoring for CO for an additional 24 hours.

The ToxiVision from Biosystems is a durable single-sensor gas detector designed to offer years of dependable and accurate service along with low cost of ownership. The ToxiVision has the following features:

- True one-button operation including calibration.
- Large LCD Display
- Operating life of up to 4000 hours from a single set of batteries
- Loud two-tone alarm and bright LED alarm
- Rugged metal-plated case is RFI-resistant to 40V/m
- Individually vacuum-tested at the factory to ensure seal
- Rated to IPX5/IPX7 against water ingress
- Optional vibrating alarm
- Optional protective rubber boot
- UL Approval Class 1 Division 1 Groups A,B,C and D
- Size: 3.5" (8.9cm) x 2.5" (6.4cm) x 1.25" (3.2cm)
- Weight: 6.7 oz. (190g)

ToxiTube dosimeter tubes are designed to respond to background carbon monoxide and give an indication of the approximate level of gas. Just break the tube on the score line and leave it in the area to be monitored. Positive CO readings show up as a stain on the internal filament and warn the resident of potential CO hazards.
